

Selección de consumibles para corte manual y ranurado

Los juegos de consumibles a continuación están hechos para usarse con antorchas manuales en el corte de acero al carbono, acero inoxidable y aluminio. Usar los parámetros especificados en *Tablas de corte* en la página 103 para el corte con antorchas manuales MAXPRO200 siempre que se usen los consumibles correspondientes a cada proceso.

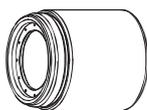

Nota: los números de pieza de consumibles indicados encima de cada tabla de corte son para las antorchas mecanizadas en particular.
